SUMMARY

Software Engineer with 4+ years of experience building software and large-scale systems with Unity and C#. Delivered products reaching 50K+ users/downloads. Currently expanding into machine learning and AI systems, while building full-stack AI-powered applications.

EXPERIENCE

Unity Developer (Junior - Mid Level)

September 2021 - April 2023

Dasi Games

Tbilisi, Georgia

- Developed mobile games using Unity and C#, implemented in-game AI entities and agents.
- Created a reusable project template and established coding standards, which significantly improved project setup and development speed.

Unity Developer (Mid - Senior Level)

April 2023 - Present

Appidea

Tbilisi, Georgia

- Led full development cycle of 2 Unity games (50K+ total downloads) as sole developer, collaborating with 10+ artists, designers, and producers
- Optimized performance: increased fps by 3X, reduced app size by 75% and memory usage by 50%
- Designed gameplay systems using SOLID principles, advanced design patterns, and finite state machines for complex behaviors.
- Implemented AI-driven agent behavior and decision logic for in-game entities.
- Implemented Firebase Analytics to track user behavior and guide gameplay improvements.

Teaching Assistant

October 2023 - June 2024

Free University of Tbilisi

Tbilisi, Georgia

- Assisted in Programming Methodology and Abstractions, providing code reviews, guidance, and helping students understand OOP and clean code.

EDUCATION

Bachelor of Computer Science

March 2022 - June 2025

Free University of Tbilisi

Tbilisi, Georgia

CERTIFICATIONS

- Machine Learning Specialization by Andrew Ng ([DeepLearning.AI](#)) April 2025
- Deep Learning Specialization by Andrew Ng ([DeepLearning.AI](#)) May 2025

SKILLS

- **AI/ML:** Python, NumPy, TensorFlow, scikit-learn, Keras, LLM APIs
- **Frameworks & Tools:** Unity, UE5, .NET, NestJS, React, Next.js, REST APIs, PostgreSQL, Firebase
- **Programming:** C#, JavaScript, TypeScript, Python

PROJECTS

- **Bear Time (Unity Game)** - [View Project](#)
Large-scale Unity mobile game where I led ~95% of the programming and system design.
- **Penguin Daily: AI-Powered Personal Progress Tracker** - [View Project](#)
Built a full-stack app with PostgreSQL database, integrating LLM-based insights for analyzing user plans and generating personalized feedback.
